	Mark	Total
1. Architecture & Deployment of Cohesive Solution		15
<ul style="list-style-type: none"> a. Deployment of Application (IDE or debug mode not used) b. Execution of Mobile Device on a device or an emulator c. Cohesive system and not a set of loose parts loose components/subsystems <ul style="list-style-type: none"> - Components all communicate with one another and with a single data source 		
2. Extended System Functionality		25
<ul style="list-style-type: none"> a. Are primary and extended business processes implemented? <ul style="list-style-type: none"> - Are procedures / tasks within identified business processes executed? - Are tasks executed from start to end? b. Is the system a primary complete solution of the problem identified? 		
3. Utility of the System		15
<ul style="list-style-type: none"> a. Does the system add value to the solution? b. Does it solve a problem? 		
4. Functional Data Handling and Manipulation		20
<ul style="list-style-type: none"> a. Do all applications have data manipulation and handling functionality specific to the project? b. System capable of producing functional reports useful for <ul style="list-style-type: none"> - Day-to-day running of the organization - Strategic (planning) level planning of the organization c. Flow of data logical 		
5. User Aspects & Graphical User Interface Design		20
<ul style="list-style-type: none"> a. Is the system user friendly and easy to use? b. Have all the user interfaces to the system been implemented? c. Are the interfaces effective and easy to navigate? d. Functional navigation between ALL user interfaces e. Layout of user interface elements f. Colour choices 		
6. Presentation and Professionalism		5
<ul style="list-style-type: none"> a. Was the team professional in their presentation of the developed system? b. Dress: Suitable for professional corporate environment? c. Did every one participate and not interrupt each other? d. Was the presentation systematic? e. Did the team practise the presentation? f. Was the team on time? g. Planning and finishing of slide show (PowerPoint) h. Was the presentation understandable?
